

## Why combined.swiss Virtual Datacenter?

Our Cloud – unique in Switzerland!

We offer professional and highly secure Cloud-package-solutions. In the meantime there are many private and public Cloud-provider on the market, which offer seemingly similar Cloud services. However the Clouds differ fundamentally. Compare the solutions and learn why **combined.swiss Virtual Datacenter** is the ideal solutions for SMEs.

Feature	combined.swiss
<p><b>Focus on SMEs</b></p> <p>Our Cloud makes possible for SMEs to access to Enterprise Cloud platforms, which usually are reserved only for big companies. Everything from one hand. Flexible and cost efficient – IT-solutions from the combined.swiss Virtual Datacenter.</p>	
<p><b>Private Cloud</b></p> <p>Our customers receive a self-contained Private Cloud for the own use We don't offer Public Clouds and Shared Hostings.</p>	
<p><b>Data storage exclusively in Switzerland</b></p> <p>The data storage and the performance of all services occurs completely in Switzerland. You always know where your data is and who your personal contact is.</p>	
<p><b>Transparent costs</b></p> <p>The utilisation-depending billing makes the costs easy to budget and transparent. The maximal performance limit can only be changed with the consent of the customer. Investments in expensive hardwares are not required. All data center functions as backup, control, automation and all security functions are included in the price and no extra costs arise.</p>	
<p><b>Full, personal and competent support in Switzerland</b></p> <p>Our many years of experience in creation and running of complex and fail-safe data centers offers our customers the possibility to have direct access to IT-specialists. We are locally present and personally contactable.</p>	
<p><b>We speak your language</b></p> <p>We speak your language. We can support you efficiently and professionally in German, Italian, English and Russian.</p>	

<p><b>The safest data center in Europe</b></p> <p>Our partner <b>Deltalis</b> operates the safest data center in Europe (Tier 4 and FINMA-corresponding) and offers maximal security standards on every level.</p>	
<p><b>Common applications supported</b></p> <p>Our cloud supports all common applications and field solutions. We package your software solution as „IT from the electrical outlet“ (Infrastructure as a Service, IaaS).</p>	
<p><b>Full data protection</b></p> <p>Proven backup-concept and monitoring for maximal data security.</p>	
<p><b>Constant and gapless monitoring</b></p> <p>Monitoring of the Private Cloud 24 x 7 with guaranteed availability according to the Service Level Agreements.</p>	
<p><b>Flexible and adaptable</b></p> <p>Virtual machines can be produced in any size. The resources for the Private Cloud can be defined free and adapted at every moment. The Cloud makes the access to your data always possible; regardless of place and time.</p>	
<p><b>Maximal security standards on every level</b></p> <p>All security functions are included in the price and are constantly updated and adapted to the current security threats. «Evergreen» – The infrastructure is always up to date.</p>
